On behalf of the Alberta Donkey and Mule Club, we are very pleased and honored to welcome Jerry Tindell back to Alberta from southern California.

Jerry comes from a very diverse background and is able to deal with any problem that you may be having with your horse, mule or donkey. He grew up in Missouri in a logging family that used horses and mules for power. "Getting the job done" was the first objective. Experiencing the behavior of horses and mules throughout his growing years has given Jerry a unique insight into the equine psyche.

Jerry's ability to transform these early lessons in life with equines has been a major part of this development today. Through a lifetime of handling horses and mules, Jerry has developed a comprehensive knowledge of equine behavior and the human skills necessary for top performance. Jerry's emphasis targets effective communication and safety. His experience instructing mounted units has established

a successful curriculum for mounted law enforcement. His many years training, riding and driving mules enhances his understanding of the mule and enables him to offer top notch guidance to all mule owners and handlers.

Hundreds of people throughout the West have improved their horsemanship and mulemanship skills by attending Jerry Tindell Clinics. Working with Jerry encourages the equine handler to look for the "try" while developing a "feel." Developing a safe, responsive equine and handler relationship is the Tindell goal. Jerry is dedicated to enhancing the horse, mule and handler experience through knowledge and practice, combined with compassion.
